# DISCLAIMER

The purpose of Active Permitted Mine Operations in Colorado, 1995–1996 is to provide an indexed list and map of active producing mines and quarries in Colorado. The sources used to compile this directory were:

- a) The Colorado Division of Minerals and Geology (CDMG) database of permitted mines and quarries, which lists operations as active that are either in production, out of production and in a reclamation process, or in suspension; and
- b) Individual mine and quarry files in the offices of CDMG, which in some cases do not clearly reflect current status.

The directory is a best faith effort by the Colorado Geological Survey to provide an accurate and up-to-date directory of producing mines and quarries from these two sources. If we have made an error of either submission or omission we apologize to those affected. If you wish you may call the Colorado Geological Survey at (303) 866-2611 or Fax at 866-2614 and speak with someone in the Minerals and Mineral Fuels Section with a correction. The remainder of this page is a form for those who wish copy it and make a correction by mail or fax.
